Sentiment Analysis Report:

1. Dataset Description:
   - The dataset contains product reviews from Amazon products.

2. Preprocessing Steps:
   - Stopwords were removed from the text.
   - Basic text cleaning was performed.

3. Evaluation of Results:
   - Sentiment analysis was performed using spaCy and TextBlob.
   - Polarity scores were used to determine sentiment.

4. Model's Strengths and Limitations:
   - Strengths:
     - Can handle large volumes of text data efficiently.
     - Provides polarity scores for sentiment analysis.
   - Limitations:
     - May not accurately capture sentiment in all contexts.
     - Relies on the quality of the spaCy and TextBlob models.
